

The Position of Quality Austria

We are happy to inform you about our new position papers:

The Integrated Managementsystem

The updated and fully revised **qualityaustria** position paper on the Integrated Management System (IMS) is now available in its fourth edition. Customers, market competitors and international professionals have paid particular attention to the paper. Compared to previous editions, this edition is referred to be the "most compact work" or "most current document" on management system integration. Topics range from the design of an Integrated Management System to further enhancement of Business Excellence.

The Audit

Request now for free the position paper "The Audit" and learn more about our understanding of audits, the **qualityaustria** audit philosophy and our six Audit categories. Quality Austria is convinced that, presently as well as in the future, the greatest benefit is created by pragmatically combining various audit categories.

From the **benefit of the Integrated Management System** to the **audit with added value** – profit now from the practical knowledge and innovative strength of Quality Austria!

Overview

- The Position of Quality Austria
- Practical Experience made with ISO 9001:2015
- Innovation with Quality - Designing the future by using ISO 9001:2015
- ISO 45001 will not be published in 2016
- Design of Quality - Eco-Effectiveness versus Eco-Efficiency
- EU Project
- EOQ Presidential Georges Borel Awarding 2016 in Helsinki
- Training and Event Tips

Practical Experience made with ISO 9001:2015

Months after ISO 9001:2015 has appeared, things have calmed down again. The number of publications has decreased. Have the hurdles when it comes to successfully changing over to this Standard already been taken? What are the facts and practical experience, in this respect? Quality Austria has made a survey among 200 customers in order to collect the first experiences.

Innovation with Quality - Designing the future by using ISO 9001:2015

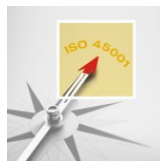

Innovation is to help new products to reach the customer and markets as soon as possible: New solutions, which often are radical, should be tried out and directly tested or used by the customer as soon as possible. Quality management, builds upon capable processes, legal certainty and the capability of durably meeting the customers' requirements.

ISO 45001 will not be published in 2016

The period for submitting statements and voting for the DIS has expired on the 12th of May 2016. There was no sufficient agreement obtained by the national bodies (72% - yes, 75% are necessary); at the same time, more than 3.000 statements were submitted. This result requires the elaboration of a new DIS.

Design of Quality - Eco-Effectiveness versus Eco-Efficiency

Waste is a thing of the past. From now on, there only are nutrients. All products remain in a steady circle. It only is healthy and unriskey materials that are used. What sounds like a version from remote future already is reality on many places. And this concept has a name: Cradle to Cradle.

EU Project

Today we would like to present the following EU-funded project with **qualityaustria** participation: "GameHub: University-enterprises cooperation in game industry in Ukraine". By building a symbiotic cooperation between universities and the game industry, the GameHub project fosters human investment into the emerging Ukrainian IT Business Sector. The main objective is to ensure employment and self-sustainability.
